

Biography - Professor Zaheer-Ud-Din Babar

Professor Zaheer Babar is a Professor of Clinical Pharmacy and Practice at the College of Pharmacy, Qatar University, and serves as a Visiting Professor in the Department of Pharmacy at the University of Huddersfield, United Kingdom. His previous academic roles include Professor of Medicines and Healthcare and Director of the Pharmaceutical Policy and Practice Research Centre at the University of Huddersfield, UK (2017-2023), as well as Head of Pharmacy Practice at the University of Auckland, New Zealand (2007-2016).

He is widely recognized for his contributions to policy and practice, particularly in the areas of quality use of medicines, medicine access, and pricing. With over 360 published papers, he is considered a leading researcher in the pharmaceutical policy research category, as indicated by Google and Scopus rankings. His work has appeared in highly regarded journals such as PLoS Medicine and *The Lancet*.

Professor Babar has acted as a consultant and advisor for numerous organizations, including the World Health Organization, Royal Pharmaceutical Society, United Nations Development Programme (UNDP), Health Action International, Management Sciences for Health (MSH), International Union Against Tuberculosis and Lung Disease, World Bank, European Union, International Pharmaceutical Federation (FIP), and the Pharmaceutical Management Agency of New Zealand.

His edited works encompass titles such as "Economic Evaluation of Pharmacy Services," "Pharmaceutical Prices in the 21st Century," "Formulating and Implementing Pharmaceutical Pricing Policies," "Pharmaceutical Policies in Countries with Developing Healthcare Systems," "Global Pharmaceutical Policy," "Access to High-Cost Medicines," "Pharmacy Practice Research Methods," "Pharmacy Practice Research Case Studies," "Encyclopedia of Pharmacy Practice and Clinical Pharmacy," and "Encyclopedia of Evidence in Pharmaceutical Public Health and Health Services Research in Pharmacy."

Professor Babar is also the founding editor-in-chief of the *Journal of Pharmaceutical Policy and Practice*, a high-impact publication that offers evidence-based insights and recommendations for policymakers, practitioners, and researchers. He is passionate about advancing the quality, equity, and sustainability of healthcare systems, as well as improving health outcomes for people around the world.
