You

□

Dear Editor,

We have published an article entitled "The influence of joint application of arsenic trioxide and daunorubicin on primary acute promyelocyticleukaemia cells and apoptosis and blood coagulation of cell strain" 2015, 28(3),1075-1078 in your journal, Pak. J. Pharm. Sci. Recently, we found that identical work was done by other researchers in China in 2014, which is earlier than our work. For the academic reputation of your valuable journal and the academic ethics of our research group, and also for the respect to the authors in other paper, we apply to withdraw our paper published in your journal.

The main responsibility is ours because we did not check the references systematically before submitting the manuscript. As a result, this published work was missed. Unforuntately, it is regret that the reviewers did not find this problem when they reviewed the manuscript.

I am the corresponding author of this article. The first author of this article have written two letters to you for applying for withdrawing our paper about two months ago. while we haven't accepted your reply till now. I'm so worry about that.

We apologize for any inconvenience caused by the withdrawal of this article.

And your prompt reply will be much appreciated. We apologize again for any inconvenience caused by the withdrawal of this article.

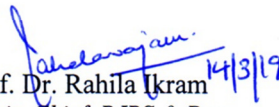

With kind regards,

Yours sincerely

Shuxia Guo

### **Note:**

This request of withdrawal received on March 14, 2019 and affixed on our webpage for information to our scientific community.
